PropelGo

— WEBSITE REVAMP · HOMEPAGE · CONCEPT 01

Money in motion. Under control.

A premium, motion-led homepage that tells one story: PropelGo connects credit, cards, vendor payments and the banking ecosystem through a single infrastructure layer.

01	Design direction & requirement mapping	p.2
02	Homepage — desktop 1440	p.3
03	Motion & interaction map (Next.js)	p.4
04	Mobile views	p.5
05	Open questions for PropelGo	p.6

THE IDEA

The arrow in the logo becomes the website.

PropelGo's mark contains an up-right arrow — *propel*. We use it as the system: every CTA ends in it, every diagram is drawn as orthogonal "payment rails" that route money from one point to another, and every animation moves forward and up. Instead of stock photos or generic 3D shapes, the site shows real product moments — an OD/CC limit, a vendor paid on a virtual card, a routing rule — in Indian context (₹, Cr, RuPay, maker-checker).

Geist Aa ₹4,82,500

GEIST MONO — DATA, AMOUNTS, LABELS · 0123456789

Geist is Vercel's typeface, loaded natively through `next/font` — zero layout shift, no third-party font request. Mono is reserved for money and system labels, which gives the site its "infrastructure" voice.

WHAT THE BRIEF ASKED → HOW THE HOMEPAGE ANSWERS

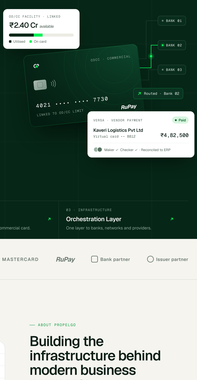

Say clearly what PropelGo does	Hero headline (option 1 from the content doc) + a product strip in the first fold naming Versa, ODCC and Orchestration in one line each.
Product & value-proposition visibility	Each product card leads with its transformation: Vendor payments → Virtual cards · Credit → Commercial card · Many connections → One layer.
"The three products shouldn't look unrelated" (product overview)	Orchestration is drawn as the full-width foundation card beneath Versa and ODCC — the layout itself explains the platform.
Storytelling, not feature lists (Mercury, Adyen, Revolut)	The hero visual plays one end-to-end journey: credit → card → vendor paid → routed → reconciled.
Trust signals & credibility	Ecosystem strip, founders + Air India Express first-transaction milestone, stats, security principles, testimonials with metrics.
Strong CTA & lead generation	"Talk to Us" in the nav, hero, capabilities and final CTA; the final CTA reuses "What happens next" from the client's contact template.
Animations (Stripe, Plaid, Marqeta, Ramp)	Motion is purposeful: it shows money moving. Full spec on page 4.
Fast, SEO-friendly, scalable	SVG/CSS motion only (no video in the first fold), server-rendered copy, CMS-driven sections so new products and resources slot in.

— ENTERPRISE PAYMENT INFRASTRUCTURE

Powering the way businesses move and manage money.

From vendor payments and commercial credit to payment orchestration and cards, PropelGo helps businesses manage modern payment operations from one platform.

— ABOUT PROPELGO

Building the infrastructure behind modern business payments.

PropelGo is an enterprise payments platform built to help businesses simplify how they move, manage, and control money.

We connect the different parts of the business payment ecosystem — from banks, issuers and card networks to payment systems, workflows and financial operations — through technology designed for greater control, visibility, and efficiency.

OUR STORY · FIRST MILESTONE
Founded by bankers and credit specialists. First transaction enabled for Air India Express.

— PLATFORM CAPABILITIES

Built to simplify complex payment operations.

Talk to our team

01 / 04

Payment orchestration

Connect and manage payment flows across a complex payment ecosystem.

02 / 04

Virtual & commercial cards

Flexible controlled, purpose-driven business spending through card-based infrastructure.

03 / 04

Workflow automation

Bring approvals, controls, and operational workflows into the payment process.

04 / 04

Reconciliation & visibility

Bring payment data, settlement information, and operational insights into one view.

— SECURITY & COMPLIANCE

Built for trust. Designed for enterprise.

Financial infrastructure is built on trust. Compliance, security and accountability are embedded into the way we build — not added after.

Compliance first
Foundational to responsible financial infrastructure, not an afterthought.

Security by design
Security as a core consideration, from the ground up.

Transparency
Open communication and accountability on every commitment.

— HERO SIGNATURE ANIMATION · 6S LOOP · REF. RAMP HERO CARD, STRIPE

PAUSES OFF-SCREEN · STATIC FRAME FOR REDUCED MOTION

0.0 - 1.2s

Credit appears

OD/CC panel fades in; the limit bar fills and a green "On card" segment slides out of it.

1.2 - 2.6s

The card lifts

ODCC card springs up into its −6° tilt; the engraved arcs rotate slowly. Cursor parallax ±8px per layer.

2.6 - 4.2s

Money routes

A rail draws from the card to Bank 02; a pulse runs along it and the "Routed · Bank 02" chip pops in.

4.2 - 6.0s

Vendor paid

Versa panel slides up, ₹4,82,500 counts up, Maker ✓ Checker ✓ tick in turn, status flips Approval → Paid.

SECTION	WHAT MOVES	TRIGGER	BUILD	REFERENCE
Hero headline	Line-by-line mask reveal; "move" sweeps to signal green after the lines land.	Load	`Motion`	Stripe
Navigation	Turns solid with backdrop blur on scroll; Products mega-menu previews each product with its mini visual.	Scroll / hover	`CSS + Motion`	Plaid
Ecosystem strip	Slow infinite marquee (40s), pauses on hover; logos go from mono to colour.	Always	`CSS`	Stripe
Overview diagram	Rails draw outward from the PropelGo core to each node in sequence; core emits a soft pulse ring.	Scroll into view	`GSAP · SVG`	Adyen
Stats	Numbers count up; the underline bars fill to value.	In view, once	`Motion`	Mercury
Versa card	Vendor rows stream in; one status pill flips Approval → Paid; the paid row highlights.	In view / hover	`Motion`	Ramp
ODCC card	Limit bar splits and the green share "flows" into the card; spend-control toggles switch on one by one.	In view / hover	`Motion`	Revolut
Orchestration card	Packets travel enterprise → layer → bank; the routing rule types itself out; the active route switches between banks every 3s.	In view, loop	`SVG + GSAP`	Marqeta
Capabilities	Section pins; scrolling advances the active tile 01 → 04 and plays its illustration (route, card fan, maker-checker, ledger match).	Scroll-scrubbed	`GSAP ScrollTrigger`	Stripe
Testimonials	Draggable carousel; metric counts up on each slide.	Drag / arrows	`Embla + Motion`	Mercury
Resources · CTA	Card graphics animate on hover; final CTA arrow line draws diagonally; "Talk to Us" button is magnetic.	Hover / in view	`Motion`	Ramp

— NEXT.JS BUILD APPROACH

Next.js 15 · App Router · TS

Copy is server-rendered for SEO; each animated block is a small client component that loads after first paint.

Motion + GSAP

Motion (Framer Motion) for UI and in-view animation; GSAP ScrollTrigger only for pinned and scroll-scrubbed sections.

Tailwind + design tokens

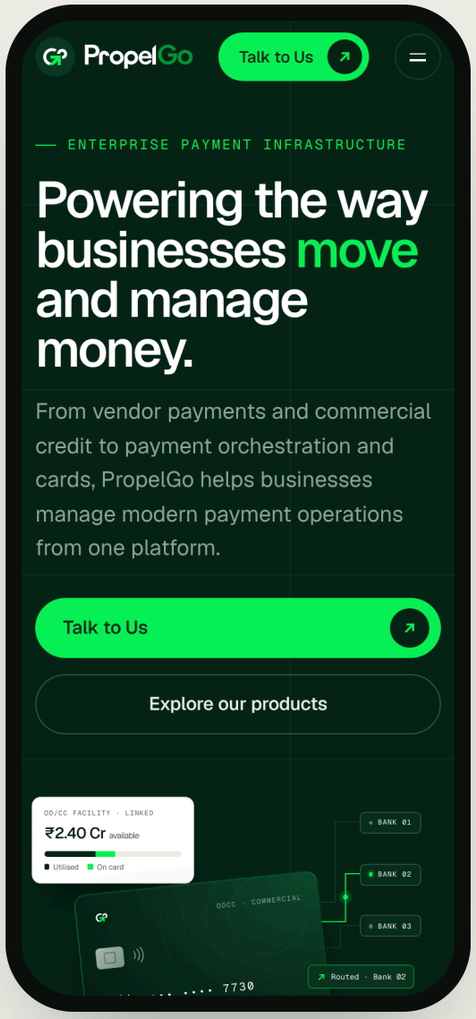

Colours, type, motion timings (200/400/800ms, ease .2,.8,.2,1) shared across all pages.

Headless CMS · performance

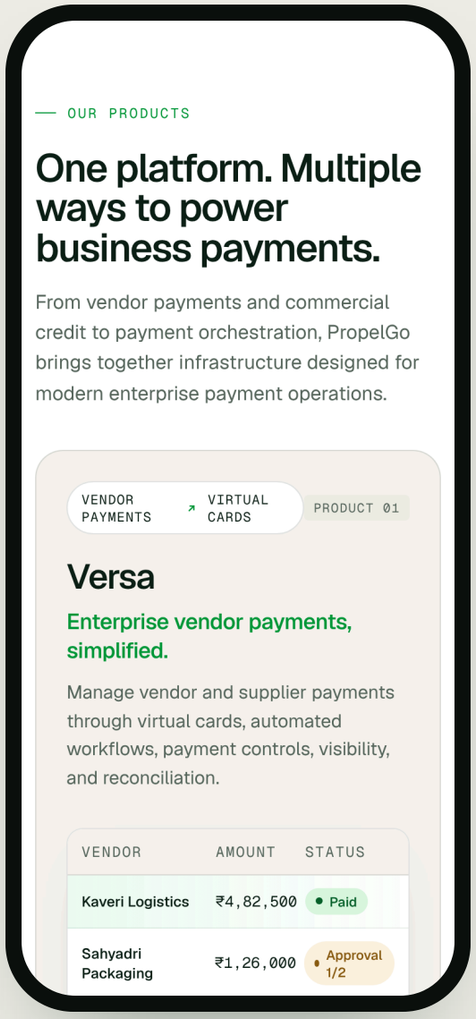

Resources, stories and stats are editable in the CMS. Targets: LCP < 2.5s, CLS < 0.1, Lighthouse 90+. Respects prefers-reduced-motion.

Same story, thumb-first.

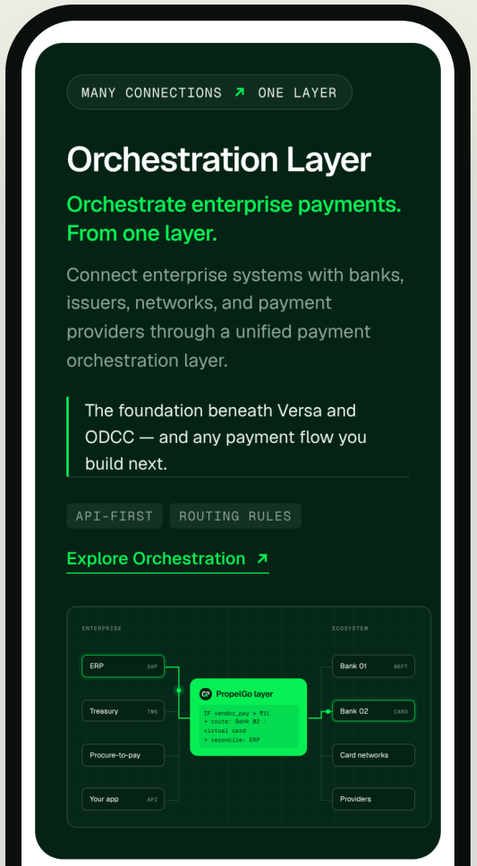

The hero visual keeps its full composition at mobile scale, so the story still plays. Product cards stack; the Orchestration diagram scales down rather than being cut. Full-width CTAs throughout.

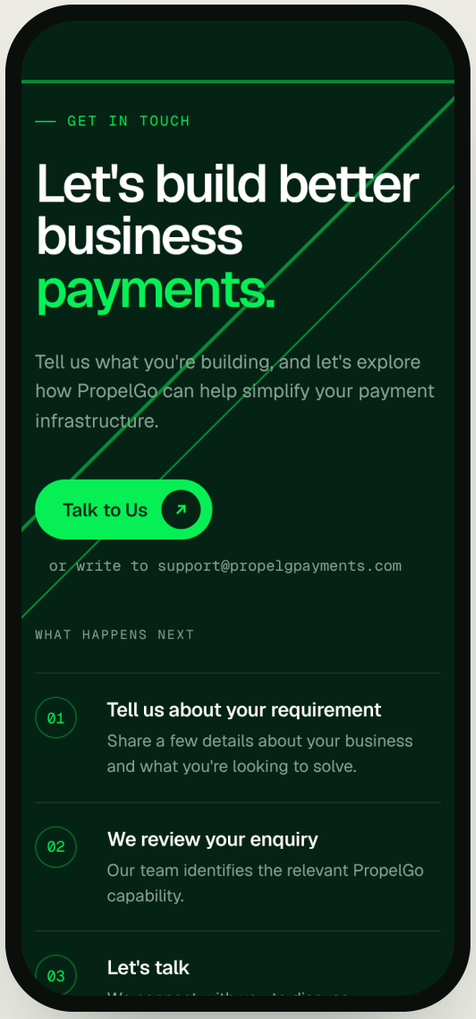

HERO

PRODUCTS · VERSA

ORCHESTRATION LAYER

FINAL CTA

To confirm before high-fidelity.

01 **VPS or Versa?**

The brief email says "VPS / Vendor Payment Service"; the sitemap, homepage copy and product docs all say "Versa". This concept uses Versa.

02 **Hero headline**

We used option 1, "Powering the way businesses move and manage money." Options 4 and 8 also fit if a shorter line is preferred.

03 **Stats, certifications, testimonials**

Shown as marked placeholders (XX+, Certification, sample quotes). We need real figures, badge files and approved quotes with names.

04 **Logo permissions**

Can we show Air India Express and Visa / Mastercard / RuPay marks? Which bank and issuer partners can be named?

05 **Bank names in product visuals**

Hero and Orchestration visuals use "Bank 01/02/03". Keep them generic, or show real partner banks?

06 **Heading case**

The content doc uses Title Case; we recommend sentence case for a calmer, more premium feel. OK to switch?

07 **Contact email**

The CTA template lists support@propelgpayments.com — please confirm the spelling and whether sales enquiries go to a different inbox.

08 **Solutions structure**

The sitemap marks Solutions as "to be discussed". Nav and footer currently show both use cases and industries.
